***Election/Restrictions***

Applicant's election without traverse of Group I, Claims 1-3, 5-22, 24-26, 28 and 29 in the reply filed on 4-21-2008 is acknowledged.

***Double Patenting***

Claims 1-3, 5-22, 24-26, 28 and d29 are provisionally rejected on the ground of nonstatutory double patenting over claims 29, 30 and 33 of copending Application No. 10/557,445. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: A person having ordinary skill in the art would have the motive and opportunity to try and experiment so as to achieve a granular or powder form with anywhere from 6-32 carbons associated with either aliphatic or a cyclic radical to create a filler composition.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Qian and Rittler are cited to show structure nad methods similar to the claimed invention.
